

# siRNA Vector Construction

## Customer information:

Customer name:	Tel:
Cooperate/ institution name:	Fax:
Address:	Zip code:
Invoice title:	E-mail:

## Order detail and requirement:

Gene name:	
Accession No.	Or Gene ID:
Species:	
Vector name:	
Vector offered by customer: (to ensure a successful experiment, please also offer vector sequence and Map).	
Note: If no specific vector is available, please offer below * items, so that we can help choose vector for you.	
*vector type	
*promoter	
*screening gene	*marker gene
Negative control	Free of charge if order more than 3 vectors
Other requirement	

Sequence name	Sequence (5'-3')	Restriction site	Vector Name

Customer signature:

Date:

## Note:

1. please fill in detailed information as listed in the format, so that we can contact you in time if necessary.
2. For any special requirement, please put it in the row of "other requirement".
3. this order sheet need be signed by the customer for confirmation, and pass us the original copy or fax to us, otherwise it won't be taken as a formal order.

---

## Product description:

1. RNAi experiment is done mainly in 2 ways:①. by chemical process: synthesize directly a double stranded RNA with 21~23bp, including UU termini. The merit of this method is quick, convenient, and low cost. But it can't be steadily expressed in a long term and the chemical residue might do harm to the cell in a certain way. ②. by shRNA expression vector, i.e., SiRNA vector construction. The merit of this method is that It can be steadily expressed in a long term.
2. We will guarantee that extreme confidentiality will be kept for contents or sequence of the gene synthesis required by our customer. Without a permission from our customer, we will not show or transfer part of or the full gene, synthesized gene to a third party. Otherwise we will compensate all the loss of the customers.
